Product Description

DL1301H Debris Loader

These units are ideal for mid to large property managers, contractors, and mid-sized municipal applications. These heavy-duty units feature a dual shredding 14.25" diameter armor plate impeller with Piranha™ blade that reduces debris up to 12:1 and maximizes trailer loading across multiple properties before dumping, saving you time and dump fees. This unit has CustomFit™ features that allow you to customize the loader to your truck. The 8" intake hose is a 10' long clear poly helical coil so your crew can visually see if a blockage occurs, for a quick fix. A replaceable steel liner and 12-gauge housing is standard for long life and durability.

Features -

Dual Shredding system with Piranha Blade

For extra shredding. Replaceable steel liner and serrated blades with cutting points for maximum truck loading and debris reduction up to 12:1.

Safety Kill Switch

Quick connect/release hose clamp with safety interlock.

Urethane Metallic Hose Kit

Clear hose allows for visual inspection and quick removal of hose clogs.
